

CLS Product Information

Product Description

Our high-grade CLS is taken from Spruce (Whitewood) and imported from a range of trusted suppliers. CLS is used primarily in timber frame home construction and for internal and partition walls. The product originated for the Canadian market – hence its full name – Canadian Lumber Standard timber.

The CLS we stock is:

- Taken from Spruce (Whitewood)
- Graded in accordance with British Standards to either C16 or C24 grade
- Kiln-dried, planed and finished with eased edges
- Imported from a range of countries
